Information Visualization: Human-Centered Issues and Perspectives (Lecture Notes in Computer Science)

Information Visualization: Human-Centered Issues and Perspectives (Lecture Notes in Computer Science)

This book is the outcome of the Dagstuhl Seminar on "Information Visualization -- Human-Centered Issues in Visual Representation, Interaction, and Evaluation" held at Dagstuhl Castle, Germany, from May 28 to June 1, 2007. Information Visualization (InfoVis) is a relatively new research area, which focuses on the use of visualization techniques to help people understand and analyze data. This book documents and extends the findings and discussions of the various sessions in detail. The seven contributions cover the most important topics: Part I is on general reflections on the value of information visualization; evaluating information visualizations; theoretical foundations of information visualization; teaching information visualization. Part II deals with specific aspects on creation and collaboration: engaging new audiences for information visualization; process and pitfalls in writing information visualization research papers; and visual analytics: definition, process, and challenges.

From reader reviews:

Leah Pelton:

What do you consider book? It is just for students since they are still students or it for all people in the world, what best subject for that? Only you can be answered for that problem above. Every person has several personality and hobby per other. Don't to be pushed someone or something that they don't desire do that. You must know how great in addition to important the book Information Visualization: Human-Centered Issues and Perspectives (Lecture Notes in Computer Science). All type of book is it possible to see on many resources. You can look for the internet solutions or other social media.

Carolyn Rodriguez:

What do you about book? It is not important together with you? Or just adding material if you want something to explain what the one you have problem? How about your free time? Or are you busy particular person? If you don't have spare time to accomplish others business, it is gives you the sense of being bored faster. And you have time? What did you do? Every individual has many questions above. They should answer that question mainly because just their can do this. It said that about book. Book is familiar in each person. Yes, it is appropriate. Because start from on pre-school until university need this specific Information Visualization: Human-Centered Issues and Perspectives (Lecture Notes in Computer Science) to read.

Albert Lightner:

Nowadays reading books become more than want or need but also become a life style. This reading addiction give you lot of advantages. The huge benefits you got of course the knowledge the actual information inside the book in which improve your knowledge and information. The knowledge you get based on what kind of guide you read, if you want get more knowledge just go with schooling books but if you want really feel happy read one having theme for entertaining for instance comic or novel. The Information Visualization: Human-Centered Issues and Perspectives (Lecture Notes in Computer Science) is kind of publication which is giving the reader unpredictable experience.

Rosemary Robinson:

Is it anyone who having spare time then spend it whole day through watching television programs or just lying on the bed? Do you need something totally new? This Information Visualization: Human-Centered Issues and Perspectives (Lecture Notes in Computer Science) can be the response, oh how comes? A book you know. You are and so out of date, spending your extra time by reading in this brand-new era is common not a nerd activity. So what these ebooks have than the others?
