Linear Differential Equations and Group Theory from Riemann to Poincare (Modern Birkhäuser Classics)

Jeremy Gray

Linear Differential Equations and Group Theory from Riemann to Poincare (Modern Birkhäuser Classics) Jeremy Gray

This book is a study of how a particular vision of the unity of mathematics, often called geometric function theory, was created in the 19th century. The central focus is on the convergence of three mathematical topics: the hypergeometric and related linear differential equations, group theory, and on-Euclidean geometry. The text for this second edition has been greatly expanded and revised, and the existing appendices enriched. The exercises have been retained, making it possible to use the book as a companion to mathematics courses at the graduate level.

From reader reviews:

Robert McKay:

The book Linear Differential Equations and Group Theory from Riemann to Poincare (Modern Birkhäuser Classics) make one feel enjoy for your spare time. You can use to make your capable much more increase. Book can being your best friend when you getting anxiety or having big problem with the subject. If you can make studying a book Linear Differential Equations and Group Theory from Riemann to Poincare (Modern Birkhäuser Classics) to be your habit, you can get much more advantages, like add your own capable, increase your knowledge about many or all subjects. You could know everything if you like wide open and read a e-book Linear Differential Equations and Group Theory from Riemann to Poincare (Modern Birkhäuser Classics). Kinds of book are several. It means that, science reserve or encyclopedia or other people. So , how do you think about this reserve?

Elois Montgomery:

Reading a publication can be one of a lot of activity that everyone in the world likes. Do you like reading book thus. There are a lot of reasons why people like it. First reading a publication will give you a lot of new information. When you read a book you will get new information simply because book is one of numerous ways to share the information or maybe their idea. Second, examining a book will make anyone more imaginative. When you reading through a book especially hype book the author will bring you to definitely imagine the story how the character types do it anything. Third, you can share your knowledge to other folks. When you read this Linear Differential Equations and Group Theory from Riemann to Poincare (Modern Birkhäuser Classics), you can tells your family, friends and soon about yours reserve. Your knowledge can inspire different ones, make them reading a reserve.

Lynn Bailey:

Typically the book Linear Differential Equations and Group Theory from Riemann to Poincare (Modern Birkhäuser Classics) has a lot details on it. So when you check out this book you can get a lot of benefit. The book was written by the very famous author. Tom makes some research previous to write this book. This kind of book very easy to read you can obtain the point easily after perusing this book.

Harold Karr:

What is your hobby? Have you heard this question when you got pupils? We believe that that question was given by teacher on their students. Many kinds of hobby, Every individual has different hobby. And you also know that little person like reading or as reading become their hobby. You must know that reading is very important and also book as to be the matter. Book is important thing to provide you knowledge, except your personal teacher or lecturer. You discover good news or update in relation to something by book. Different categories of books that can you take to be your object. One of them is this Linear Differential Equations and Group Theory from Riemann to Poincare (Modern Birkhäuser Classics).
