Trauma-Focused CBT for Children and Adolescents: Treatment Applications

Featuring a wealth of clinical examples, this book facilitates implementation of trauma-focused cognitive-behavioral therapy (TF-CBT) in a range of contexts. It demonstrates how assessment strategies and treatment components can be tailored to optimally serve clients' needs while maintaining overall fidelity to the TF-CBT model. Coverage includes ways to overcome barriers to implementation in residential settings, foster placements, and low-resource countries. Contributors also describe how to use play to creatively engage kids of different ages, and present TF-CBT applications for adolescents with complex trauma, children with developmental challenges, military families struggling with the stresses of deployment, and Latino and Native American children.
