Segmented Work, Divided Workers presents a restatement and expansion of the theory of labor segmentation by three of its founding scholars. The authors argue that divisions within the US working class are rooted in a segmentation of jobs since World War II. They explain the origins of job segmentation through a careful and systematic historical analysis of changes in the labor process and the structure of labor markets since the early 1800s. This analysis builds, in turn, upon hypotheses about successive stages in the history of capitalist development. Segmented Work, Divided Workers integrates this economic analysis with a careful historical appreciation of the complexity of working-class experience in the United States.
