Supercritical Fluids Technology in Lipase Catalyzed Processes

Sulaiman Al-Zuhair, Hanifa Taher

Supercritical Fluids Technology in Lipase Catalyzed Processes Sulaiman Al-Zuhair, Hanifa Taher

Enzymes are currently used in various industries, most commonly in food, detergents, and pharmaceuticals production. Lipases are hydrolytic enzymes that demonstrate great potential as an alternative to conventional catalysts in a number of industrial applications. A complete understanding of enzymes, and their proteins structure and environmental behavior, can greatly aid in the further development of industrial applications.

Supercritical Fluids Technology in Lipase Catalyzed Processes provides basic information about enzymes, their sources, reaction kinetics, and main industrial applications. The book focuses in lipases. their main sources, structure, and features, with an emphasis on their specificity and interfacial activity, and presents proven techniques for isolating, extracting, and purifying.

Comprised of six compact chapters, this comprehensive guide introduces:

- Immobilization techniques and immobilized lipases that allow repeated use (which is essential from an economic point of view)
- Different bioreactor configurations using immobilized lipases
- The latest information on the available technologies in lipolytic reactions
- The advantages of nonaqueous media in biochemical synthesis over aqueous and solvent-free systems
- Material on the use of lipases in nonaqueous media to overcome the drawbacks usually encountered with the use of conventional chemical catalysts
- The use of supercritical fluids (SCFs) as a green alternative reaction medium
- Factors affecting the physical properties of lipases in this medium and, hence, their activity and stability
- A case study using supercritical carbon dioxide (SC-CO₂) for biodiesel production
- Novel, cutting-edge technology, using immobilized enzymes to reduce the overall production cost

Supercritical Fluids Technology in Lipase Catalyzed Processes outlines the main industrial applications of common enzymes and discusses relevant challenges and innovations emerging in the field.

From reader reviews:

Bryan Smith:

As people who live in the particular modest era should be change about what going on or facts even knowledge to make these keep up with the era which can be always change and progress. Some of you maybe can update themselves by reading books. It is a good choice for you but the problems coming to you is you don't know which one you should start with. This Supercritical Fluids Technology in Lipase Catalyzed Processes is our recommendation to make you keep up with the world. Why, as this book serves what you want and want in this era.

Craig Harrison:

A lot of people always spent their free time to vacation as well as go to the outside with them family members or their friend. Are you aware? Many a lot of people spent they free time just watching TV, or even playing video games all day long. In order to try to find a new activity that's look different you can read some sort of book. It is really fun for you. If you enjoy the book that you read you can spent 24 hours a day to reading a publication. The book Supercritical Fluids Technology in Lipase Catalyzed Processes it is very good to read. There are a lot of people who recommended this book. These folks were enjoying reading this book. In case you did not have enough space to bring this book you can buy often the e-book. You can m0ore simply to read this book out of your smart phone. The price is not to cover but this book possesses high quality.

Louis Gayman:

Beside this kind of Supercritical Fluids Technology in Lipase Catalyzed Processes in your phone, it might give you a way to get nearer to the new knowledge or facts. The information and the knowledge you are going to got here is fresh from your oven so don't end up being worry if you feel like an outdated people live in narrow commune. It is good thing to have Supercritical Fluids Technology in Lipase Catalyzed Processes because this book offers for you readable information. Do you at times have book but you don't get what it's facts concerning. Oh come on, that will not end up to happen if you have this in the hand. The Enjoyable arrangement here cannot be questionable, including treasuring beautiful island. Techniques you still want to miss it? Find this book as well as read it from at this point!

Karen Lambert:

That e-book can make you to feel relax. This book Supercritical Fluids Technology in Lipase Catalyzed Processes was colourful and of course has pictures on the website. As we know that book Supercritical Fluids Technology in Lipase Catalyzed Processes has many kinds or style. Start from kids until young adults. For example Naruto or Private investigator Conan you can read and believe that you are the character on there. Therefore not at all of book usually are make you bored, any it can make you feel happy, fun and relax. Try to choose the best book in your case and try to like reading which.
