Gina Spadafori, Universal Press Syndicate pet care columnist and host of AOL's "Gina Spadafori's Pet Connection," follows her educational and entertaining book *Dogs for Dummies with Cats for Dummies*, which she co-authors with Paul Pion, D.V.M., D.A.C.V.I.M., president of the Veterinary Information Network. If you own a cat or are considering cat ownership, *Cats for Dummies* is the one book you really must have. This educational, comprehensive, and entertaining book is probably the closest you'll get to a cat "owners' manual." Beginning with a foreword by Lilian Jackson Braun, the cat-owned author of *The Cat Who...* mystery novels, the book quickly moves into a brief history of cats, cat psychology, and their recent amazing growth in popularity. Spadafori and Pion spend a considerable amount of time on the selection of a cat breed. While size and in-bred behaviors don't vary in cats as much as they do in dogs, different breeds of cats do have distinctive traits and temperaments that should be considered when deciding on a purebred animal. Physical characteristics, such as coat type, should also be considered. Some cats require a great deal more grooming than others do. The authors are frank in their discussion of the fate of poorly chosen cats who wind up in shelters because they were too much work and not right for the person who had selected them. For readers considering a purebred cat, Spadafori and Pion provide tips and resources, including magazines, Web sites and Cat Fanciers Association breed clubs. They also give information on screening breeders to weed out the "truly evil" and the simply ignorant. They strongly encourage adoption of shelter cats, though, pointing out that many of these animals are young, healthy, and affectionate and may have been given up through no fault of their own. Adult shelter cats, Spadafori says, can be a particularly good choice, especially for an older person, since they are past their kitten craziness.
