The 1992 release of the "Director's Cut" only confirmed what the international film cognoscenti have known all along: Ridley Scott's *Blade Runner*, based on Philip K. Dick's brilliant and troubling SF novel *Do Androids Dream of Electric Sheep*, still rules as the most visually dense, thematically challenging, and influential SF film ever made.

Future Noir is the story of that triumph.

The making of *Blade Runner* was a seven-year odyssey that would test the stamina and the imagination of writers, producers, special effects wizards, and the most innovative art directors and set designers in the industry.

A fascinating look at the ever-shifting interface between commerce and the art that is modern Hollywood, *Future Noir* is the intense, intimate, anything-but-glamorous inside account of how the work of SF's most uncompromising author was transformed into a critical sensation, a commercial success, and a cult classic.
