The Art of Computer Programming, Volume 1, Fascicle 1: MMIX -- A RISC Computer for the New Millennium Donald E. Knuth

Finally, after a wait of more than thirty-five years, the first part of Volume 4 is at last ready for publication. Check out the boxed set that brings together Volumes 1 - 4A in one elegant case, and offers the purchaser a \$50 discount off the price of buying the four volumes individually.

The Art of Computer Programming, Volumes 1-4A Boxed Set, 3/e

ISBN: 0321751043

Art of Computer Programming, Volume 1, Fascicle 1, The: MMIX -- A RISC Computer for the New Millennium

This multivolume work on the analysis of algorithms has long been recognized as the definitive description of classical computer science. The three complete volumes published to date already comprise a unique and invaluable resource in programming theory and practice. Countless readers have spoken about the profound personal influence of Knuth's writings. Scientists have marveled at the beauty and elegance of his analysis, while practicing programmers have successfully applied his "cookbook" solutions to their day-to-day problems. All have admired Knuth for the breadth, clarity, accuracy, and good humor found in his books. To begin the fourth and later volumes of the set, and to update parts of the existing three, Knuth has created a series of small books called fascicles, which will be published at regular intervals. Each fascicle will encompass a section or more of wholly new or revised material. Ultimately, the content of these fascicles will be rolled up into the comprehensive, final versions of each volume, and the enormous undertaking that began in 1962 will be complete.

Volume 1, Fascicle 1

This first fascicle updates *The Art of Computer Programming, Volume 1, Third Edition: Fundamental Algorithms*, and ultimately will become part of the fourth edition of that book. Specifically, it provides a programmer's introduction to the long-awaited MMIX, a RISC-based computer that replaces the original MIX, and describes the MMIX assembly language. The fascicle also presents new material on subroutines, coroutines, and interpretive routines.

From reader reviews:

Robin Curtin:

Nowadays reading books are more than want or need but also work as a life style. This reading routine give you lot of advantages. Associate programs you got of course the knowledge the rest of the information inside the book this improve your knowledge and information. The details you get based on what kind of e-book you read, if you want get more knowledge just go with knowledge books but if you want experience happy read one using theme for entertaining like comic or novel. The The Art of Computer Programming, Volume 1, Fascicle 1: MMIX -- A RISC Computer for the New Millennium is kind of guide which is giving the reader unpredictable experience.

Celia Norton:

Reading a e-book can be one of a lot of action that everyone in the world really likes. Do you like reading book and so. There are a lot of reasons why people like it. First reading a guide will give you a lot of new information. When you read a guide you will get new information due to the fact book is one of several ways to share the information or perhaps their idea. Second, examining a book will make you more imaginative. When you looking at a book especially tale fantasy book the author will bring you to definitely imagine the story how the character types do it anything. Third, you can share your knowledge to other individuals. When you read this The Art of Computer Programming, Volume 1, Fascicle 1: MMIX -- A RISC Computer for the New Millennium, you can tells your family, friends in addition to soon about yours reserve. Your knowledge can inspire average, make them reading a guide.

Denise Barnhart:

Are you kind of busy person, only have 10 or 15 minute in your time to upgrading your mind expertise or thinking skill possibly analytical thinking? Then you are having problem with the book in comparison with can satisfy your short space of time to read it because pretty much everything time you only find reserve that need more time to be examine. The Art of Computer Programming, Volume 1, Fascicle 1: MMIX -- A RISC Computer for the New Millennium can be your answer because it can be read by you actually who have those short spare time problems.

Jennifer Valdovinos:

In this era globalization it is important to someone to get information. The information will make you to definitely understand the condition of the world. The condition of the world makes the information quicker to share. You can find a lot of sources to get information example: internet, magazine, book, and soon. You can view that now, a lot of publisher that will print many kinds of book. The book that recommended to your account is The Art of Computer Programming, Volume 1, Fascicle 1: MMIX -- A RISC Computer for the New Millennium this publication consist a lot of the information of the condition of this world now. This particular book was represented how can the world has grown up. The vocabulary styles that writer use to

explain it is easy to understand. Often the writer made some exploration when he makes this book. That's why this book acceptable all of you.
