This manual provides clear, concise management advice from a team of leaders in emergency veterinary medicine, making it a valuable text for the classroom and an indispensable resource for emergency situations in daily veterinary practice.

Written in an easy-to-follow outline format, this book gives you rapid access to essential information needed to stabilize and treat the emergency and critical care patient. The first part of the book outlines initial care of the trauma or critical patient, followed by coverage that ranges from triage to basic fluid therapy, monitoring, and continuous care. The second part of the book features emergency care coverage organized by body system, beginning with the general approach to patients with emergent signs in each system and followed by protocols for specific conditions.

In this manual you'll find-- •

A wide range of useful formulas, tables, drug dosages, and illustrations make this book a vital resource for practicing veterinarians and veterinary students alike.
