An Introduction to Statistical Learning: with Applications in R (Springer Texts in Statistics) Gareth James, Daniela Witten, Trevor Hastie, Robert Tibshirani

An Introduction to Statistical Learning provides an accessible overview of the field of statistical learning, an essential toolset for making sense of the vast and complex data sets that have emerged in fields ranging from biology to finance to marketing to astrophysics in the past twenty years. This book presents some of the most important modeling and prediction techniques, along with relevant applications. Topics include linear regression, classification, resampling methods, shrinkage approaches, tree-based methods, support vector machines, clustering, and more. Color graphics and real-world examples are used to illustrate the methods presented. Since the goal of this textbook is to facilitate the use of these statistical learning techniques by practitioners in science, industry, and other fields, each chapter contains a tutorial on implementing the analyses and methods presented in R, an extremely popular open source statistical software platform.

Two of the authors co-wrote The Elements of Statistical Learning (Hastie, Tibshirani and Friedman, 2nd edition 2009), a popular reference book for statistics and machine learning researchers. **An Introduction to Statistical Learning** covers many of the same topics, but at a level accessible to a much broader audience. This book is targeted at statisticians and non-statisticians alike who wish to use cutting-edge statistical learning techniques to analyze their data. The text assumes only a previous course in linear regression and no knowledge of matrix algebra.

From reader reviews:

Margherita Pettit:

Spent a free time to be fun activity to accomplish! A lot of people spent their free time with their family, or all their friends. Usually they doing activity like watching television, likely to beach, or picnic in the park. They actually doing same thing every week. Do you feel it? Do you want to something different to fill your personal free time/ holiday? May be reading a book is usually option to fill your totally free time/ holiday. The first thing that you ask may be what kinds of publication that you should read. If you want to try look for book, may be the e-book untitled An Introduction to Statistical Learning: with Applications in R (Springer Texts in Statistics) can be good book to read. May be it could be best activity to you.

Judith Duncan:

The reason why? Because this An Introduction to Statistical Learning: with Applications in R (Springer Texts in Statistics) is an unordinary book that the inside of the e-book waiting for you to snap this but latter it will distress you with the secret that inside. Reading this book adjacent to it was fantastic author who else write the book in such amazing way makes the content inside of easier to understand, entertaining approach but still convey the meaning totally. So , it is good for you for not hesitating having this ever again or you going to regret it. This unique book will give you a lot of benefits than the other book get such as help improving your expertise and your critical thinking technique. So , still want to postpone having that book? If I had been you I will go to the publication store hurriedly.

Michael Brown:

Do you have something that you prefer such as book? The book lovers usually prefer to pick book like comic, limited story and the biggest the first is novel. Now, why not seeking An Introduction to Statistical Learning: with Applications in R (Springer Texts in Statistics) that give your entertainment preference will be satisfied through reading this book. Reading habit all over the world can be said as the way for people to know world much better then how they react towards the world. It can't be said constantly that reading habit only for the geeky individual but for all of you who wants to be success person. So , for every you who want to start reading through as your good habit, you could pick An Introduction to Statistical Learning: with Applications in R (Springer Texts in Statistics) become your own starter.

Jessica Duncan:

Reserve is one of source of expertise. We can add our information from it. Not only for students but additionally native or citizen have to have book to know the up-date information of year in order to year. As we know those guides have many advantages. Beside we add our knowledge, can bring us to around the world. Through the book An Introduction to Statistical Learning: with Applications in R (Springer Texts in Statistics) we can consider more advantage. Don't someone to be creative people? For being creative person must like to read a book. Just choose the best book that suited with your aim. Don't be doubt to change your

life at this time book An Introduction to Statistical Learning: with Applications in R (Springer Texts in Statistics). You can more inviting than now.
