Multicore microprocessors are now at the heart of nearly all desktop and laptop computers. While these chips offer exciting opportunities for the creation of newer and faster applications, they also challenge students and educators. How can the new generation of computer scientists growing up with multicore chips learn to program applications that exploit this latent processing power? This unique book is an attempt to introduce concurrent programming to first-year computer science students, much earlier than most competing products.

This book assumes no programming background but offers a broad coverage of Java. It includes over 150 numbered and numerous inline examples as well as more than 300 exercises categorized as “conceptual,” “programming,” and “experiments.” The problem-oriented approach presents a problem, explains supporting concepts, outlines necessary syntax, and finally provides its solution. All programs in the book are available for download and experimentation. A substantial index of at least 5000 entries makes it easy for readers to locate relevant information.

In a fast-changing field, this book is continually updated and refined. The 2014 version is the seventh “draft edition” of this volume, and features numerous revisions based on student feedback.

A list of errata for this version can be found on the Purdue University Department of Computer Science website.

From reader reviews:

Fernando Rowe:

In this 21st century, people become competitive in every way. By being competitive today, people have to do something to make themselves survive, being in the middle of typically the crowded place and notice through surroundings. One thing that often many people have underestimated the idea for a while is reading. Sure, by reading a book your ability to survive rises then having a chance to stand out than others is high. In your case who wants to start reading any book, we give you that *Start Concurrent: An Introduction to Problem Solving in Java with a Focus on Concurrency, 2014* book as a nice and daily reading reserve. Why, because this book is more than just a book.

Michael Bennett:

The ability that you get from *Start Concurrent: An Introduction to Problem Solving in Java with a Focus on Concurrency, 2014* is a more deep rooting of the information that hides into the words the more you get enthusiastic about reading it. It doesn't mean that this book is hard to comprehend but *Start Concurrent: An Introduction to Problem Solving in Java with a Focus on Concurrency, 2014* giving you an enjoyment feeling of reading. The article writer conveys their point in a selected way that can be understood by simply anyone who reads it because the author of this book is well-known enough. This book also makes your own personal vocabulary increase well. That makes it easy to understand then can go along with you, both in printed or e-book style are available. We highly recommend you for having that *Start Concurrent: An Introduction to Problem Solving in Java with a Focus on Concurrency, 2014* instantly.

Augustus Chase:

Reading can be called an imagination hangout, why? Because while you are reading a book specifically a book entitled *Start Concurrent: An Introduction to Problem Solving in Java with a Focus on Concurrency, 2014* your brain will drift away through every dimension, wandering in every single aspect that maybe unfamiliar for but surely might be your mind friends. Imagining just about every word written in a guide then become one web form conclusion and explanation that maybe you never get prior to. The *Start Concurrent: An Introduction to Problem Solving in Java with a Focus on Concurrency, 2014* giving you a different experience more than blown away the mind but also giving you useful facts for your better life with this era. So now let us teach you the relaxing pattern at this point is your body and mind will be pleased when you are finished reading it, like winning a game. Do you want to try this extraordinary spending spare time activity?

Luther Keller:

Reading a book being a new life style in this calendar year; every people loves to study a book. When you study a book you can get a great deal of benefit. When you read textbooks, you can improve your knowledge, due to the fact a book has a lot of information into it. The information that you will get depends on what sorts of book that you have read. If you would like to get information about your research, you can read

education books, but if you want to entertain yourself you are able to a fiction books, these kinds of us novel, comics, in addition to soon. The Start Concurrent: An Introduction to Problem Solving in Java with a Focus on Concurrency, 2014 offer you a new experience in reading a book.
