Data Preparation for Data Mining (The Morgan Kaufmann Series in Data Management Systems)

Dorian Pyle

Data Preparation for Data Mining addresses an issue unfortunately ignored by most authorities on data mining: data preparation. Thanks largely to its perceived difficulty, data preparation has traditionally taken a backseat to the more alluring question of how best to extract meaningful knowledge. But without adequate preparation of your data, the return on the resources invested in mining is certain to be disappointing.

Dorian Pyle corrects this imbalance. A twenty-five-year veteran of what has become the data mining industry, Pyle shares his own successful data preparation methodology, offering both a conceptual overview for managers and complete technical details for IT professionals. Apply his techniques and watch your mining efforts pay off-in the form of improved performance, reduced distortion, and more valuable results.

On the enclosed CD-ROM, you'll find a suite of programs as C source code and compiled into a command-line-driven toolkit. This code illustrates how the author's techniques can be applied to arrive at an automated preparation solution that works for you. Also included are demonstration versions of three commercial products that help with data preparation, along with sample data with which you can practice and experiment.

- * Offers in-depth coverage of an essential but largely ignored subject.
- * Goes far beyond theory, leading you-step by step-through the author's own data preparation techniques.
- * Provides practical illustrations of the author's methodology using realistic sample data sets.
- * Includes algorithms you can apply directly to your own project, along with instructions for understanding when automation is possible and when greater intervention is required.
- * Explains how to identify and correct data problems that may be present in your application.
- * Prepares miners, helping them head into preparation with a better understanding of data sets and their limitations.

From reader reviews:

Inez Morales:

Book is to be different for every grade. Book for children until eventually adult are different content. As it is known to us that book is very important for all of us. The book Data Preparation for Data Mining (The Morgan Kaufmann Series in Data Management Systems) ended up being making you to know about other understanding and of course you can take more information. It is extremely advantages for you. The book Data Preparation for Data Mining (The Morgan Kaufmann Series in Data Management Systems) is not only giving you a lot more new information but also to get your friend when you feel bored. You can spend your current spend time to read your reserve. Try to make relationship with the book Data Preparation for Data Mining (The Morgan Kaufmann Series in Data Management Systems). You never experience lose out for everything should you read some books.

Lawrence Howe:

This book untitled Data Preparation for Data Mining (The Morgan Kaufmann Series in Data Management Systems) to be one of several books which best seller in this year, that's because when you read this e-book you can get a lot of benefit on it. You will easily to buy this specific book in the book retail outlet or you can order it by means of online. The publisher in this book sells the e-book too. It makes you more readily to read this book, since you can read this book in your Smartphone. So there is no reason to your account to past this publication from your list.

Jeffrey David:

Your reading 6th sense will not betray anyone, why because this Data Preparation for Data Mining (The Morgan Kaufmann Series in Data Management Systems) e-book written by well-known writer who really knows well how to make book that can be understand by anyone who have read the book. Written in good manner for you, leaking every ideas and composing skill only for eliminate your hunger then you still hesitation Data Preparation for Data Mining (The Morgan Kaufmann Series in Data Management Systems) as good book not merely by the cover but also with the content. This is one guide that can break don't judge book by its protect, so do you still needing an additional sixth sense to pick this!? Oh come on your reading through sixth sense already said so why you have to listening to another sixth sense.

Chester Brown:

That guide can make you to feel relax. This kind of book Data Preparation for Data Mining (The Morgan Kaufmann Series in Data Management Systems) was colorful and of course has pictures around. As we know that book Data Preparation for Data Mining (The Morgan Kaufmann Series in Data Management Systems) has many kinds or style. Start from kids until adolescents. For example Naruto or Detective Conan you can read and feel that you are the character on there. Therefore not at all of book are generally make you bored, any it can make you feel happy, fun and unwind. Try to choose the best book for you personally and

try to like reading in which.
