*"This book is by far the best computer programming book I have ever bought. You can go into my upstairs closet and find 20-30 books that I have purchased since the days of VB6.... All together, they could not add up to as much information as you have given me in the first 11 chapters of this book." (A developer's comment on the previous edition of Murach's ASP.NET)*

Already know how to code Visual Basic 2008 desktop applications? Then, you're ready to master web programming with the 3.5 edition of this best-selling ASP.NET book from Murach Books.

It covers the 3.5 features that provide new functionality...like the ListView and DataPager data controls, LINQ data sources, new CSS-related tools, and ASP.NET AJAX...while it teaches you how to develop web applications from scratch. And it does that using all the same features that have made earlier editions such favorites among professional developers:

- #1. It's concise, practical, and crystal-clear in telling you what you need to know
- #2. It shows you how to get the most from Visual Studio 2008 as you code, test, debug, and deploy ASP.NET web applications
- #3. It gives you a 7-chapter section on database programming...2 more chapters than in the previous edition because .NET continues to deliver new, powerful tools for this critical component of business applications
- #4. It gives you solid training in the essential skills that you'll use every day, including data validation...state management...improving the user experience with easy site navigation and a standard look and feel...boosting user response time with ASP.NET AJAX...handling security...developing reusable controls...working with database data using SQL, object, and LINQ data sources...and more
- #5. It gives you real-world application examples that guide you in applying what you're learning as you develop your own websites (you can download the applications for free from the Murach website)
- #6. Its paired pages presentation makes for fast reading, instant reinforcement, and time-saving reference (to see how the paired pages work, you can download free chapters from the Murach website)

**So if you need to learn ASP.NET 3.5 web programming, we hope you'll try this book first. We're convinced that it will deliver the training you need better and faster than any competing book.**
