William James influences on Psychology theory are as the follows:

## 1) Pragmatism

According to pragmatism, the truth of an idea can never be proven. James proposed we instead focus on what he called the "cash value," or usefulness, of an idea.

## 2) Functionalism

James opposed breaking down mental events to the smallest elements. Instead, James focused on the wholeness of an event, taking into the impact of the environment on behavior.

## 3) James-Lange Theory of Emotion

The James-Lange theory of emotion proposes that an event triggers a physiological reaction, which we then interpret. According to this theory, emotions are caused by our interpretations of these physiological reactions.

Each of these themes is connected with aspects of relevant economic literature and is the contribution of James' pragmatism to economic theory.
