## Advances in Research on Neurodegeneration: Volume 10 (Journal of Neural Transmission. Supplementa)

The 10th International Winter Conference on Neurodegeneration (IWCN) has taken place from February 14-16, 2002, at the lovely "SchloB Ziethen", an old prussian manor (in Prussia, 'faute de mieux', called 'SchloB', i. e. castle or residence). This place is 20 km off Tegel Airport, Berlin's main airport, and has been beautifully restored by baroness Edith von Thiingen (nee von BUlow, i. e. of historical Prussian aristocracy); it lends itself rather perfectly for the IWCN type of small interdisciplinary workshops on neurodegeneration which combine short lectures with plenty of discussion. In this context, we could quote Alexander von Humboldt's famous opening words for one of the first international scientific meetings held at Berlin, on September 18, 1828: "The main purpose ...does not consist in a mutual reading of manuscripts all to be printed after at least one year in specialised publications, but in the personal communication amongst those who work in similar scientific fields; the oral and thus more stimulating exchange of ideas, might they represent facts, opinions or doubts; the foundation of friendly relations which convey illumination to our sciences, serene grace to our lives and tolerance and mildness to our habits . ..Berlin, Sept. 18, 1828  
Alexander von Humboldt To the IWCN aficionado, it may come as a little surprise that this is the publication of the 10th Winter Conference as this might mean that they must have missed number 9.

### **From reader reviews:**

#### **John Starr:**

As people who live in the particular modest era should be upgrade about what going on or information even knowledge to make all of them keep up with the era which can be always change and move forward. Some of you maybe can update themselves by looking at books. It is a good choice in your case but the problems coming to you actually is you don't know what type you should start with. This Advances in Research on Neurodegeneration: Volume 10 (Journal of Neural Transmission. Supplementa) is our recommendation to cause you to keep up with the world. Why, since this book serves what you want and want in this era.

#### **Daniel White:**

The actual book Advances in Research on Neurodegeneration: Volume 10 (Journal of Neural Transmission. Supplementa) will bring you to the new experience of reading the book. The author style to describe the idea is very unique. Should you try to find new book to read, this book very ideal to you. The book Advances in Research on Neurodegeneration: Volume 10 (Journal of Neural Transmission. Supplementa) is much recommended to you to see. You can also get the e-book from your official web site, so you can quicker to read the book.

#### **John Yates:**

The book Advances in Research on Neurodegeneration: Volume 10 (Journal of Neural Transmission. Supplementa) has a lot details on it. So when you check out this book you can get a lot of help. The book was published by the very famous author. The author makes some research just before write this book. This particular book very easy to read you will get the point easily after scanning this book.

#### **Bonnie Gallup:**

A lot of guide has printed but it takes a different approach. You can get it by web on social media. You can choose the most beneficial book for you, science, witty, novel, or whatever by simply searching from it. It is referred to as of book Advances in Research on Neurodegeneration: Volume 10 (Journal of Neural Transmission. Supplementa). You can include your knowledge by it. Without departing the printed book, it might add your knowledge and make a person happier to read. It is most significant that, you must aware about reserve. It can bring you from one destination for a other place.
