The International Handbook of Environmental Sociology, Second Edition (Elgar Original Reference)

Michael R. Redclift, Graham Woodgate

This thoroughly revised *Handbook* provides an assessment of the scope and content of environmental sociology, and sets out the intellectual and practical challenges posed by the urgent need for policy and action to address accelerating environmental change.

More than a decade has passed since the first edition of the *Handbook* was published to considerable acclaim, and environmental sociology has since become firmly established as a critical social science discipline. This second edition is a major interdisciplinary reference work comprising more than 25 original essays authored by leading scholars, many of whom are intimately involved in national, regional or global environmental policy processes. It marks some of the changes and continuities in the field of environmental sociology, and highlights today's substantive concerns and theoretical debates. The *Handbook* is divided into three parts covering concepts and theories, critical issues and international perspectives, each with an introduction outlining the content of the constituent chapters and cross-referencing some of the more significant themes that link them together.

Authoritative and comprehensive, this *Handbook* will prove to be essential reading for academics, researchers and students across the social sciences who are interested in the environment. It will also be enthusiastically received by sustainable development policy makers and practitioners.

Contributors: W.M. Adams, B. Ambrose-Oji, I. Barcena Hinojal, T. Benton, R.L. Bryant, F.H. Buttel, C.N. Buzinde, J. Carmin, T. Dietz, R.E. Dunlap, A. Escobar, J.B. Foster, M.K. Goodman, N. Haenn, J.
